**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) ☒ Responsive to communication(s) filed on 18 February 2003.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.

## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1, 3-6, 9-12, 14, 31, 35 and 37, drawn to an isolated nucleic acid.

Group II, claim(s) 2, 8, 19, 20 and 31, drawn to an isolated polypeptide.

Group III, claim(s) 13, drawn to a method of making a recombinant host cell.

Group IV, claim(s) 16-18 and 32, drawn to an antibody.

Group V, claim(s) 21-26, drawn to a method for preventing, treat, modulating or ameliorating a medical condition.

Group VI, claim(s) 27-30, drawn to a method of diagnosing a pathological condition.

Group VII, claim(s) 33, drawn to a method for identifying a binding partner.

Group VII, claim(s) 36, drawn to a method of identifying an activity of an expressed polypeptide in a biological assay.

Group VIII, claim(s) 38-42, drawn to a kit.

Group IX, claim(s) 43, drawn to a method for detecting the presence of a nucleic acid encoding a protein in a mammalian tissue sample.

The inventions listed as Groups I-IX do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The inventions listed as Groups I-IX do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The isolated nucleotide of at least claim 1 is not joined to the polypeptide of at least claim 2, antibody of at least claim 16, the kit of at least claim 38 or the methods of at least claims 13, 21, 27, 33, 36 and 43. The isolated nucleotide is required to comprise a specific sequence. This is not a special technical feature which joins the claimed inventions because Fernandez et al. (Genomics, 1996) teach this sequence (see p. 370). The polypeptide of at least claim 2, antibody of at least claim 16, the kit of at least claim 38 or the methods of at least claims 13, 21, 27, 33, 36 and 43 are not limited in scope as to require the sequence of claim 1 and therefore are not joined by a special

Art Unit: 1637

technical feature. Further the nucleic acid sequences claimed in the instant application are not patentably distinct and contain no common core structure. These sequences do not code for a single gene or even an operon of genes. Applicant is therefore required to chose one SEQ ID NO for examination.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Patent applicants with problems or questions regarding electronic images that can be viewed in the Patent Application Information Retrieval system (PAIR) can now contact the USPTO's Patent Electronic Business Center (Patent EBC) for assistance. Representatives are available to answer your questions daily from 6 am to midnight (EST). The toll free number is (866) 217-9197. When calling please have your application serial or patent number, the type of document you are having an image problem with, the number of pages and the specific nature of the problem. The Patent Electronic Business Center will notify applicants of the resolution of the problem within 5-7 business days. Applicants can also check PAIR to confirm that the problem has been corrected. The USPTO's Patent Electronic Business Center is a complete service center supporting all patent business on the Internet. The USPTO's PAIR system provides Internet-based access to patent application status and history information. It also enables applicants to view the scanned images of their own application file folder(s) as well as general patent information available to the public. For more information about the PAIR system, see <http://pair-direct.uspto.gov>.

For all other customer support, please call the USPTO Call Center (UCC) at 800-786-9199.
